

METAL FORMS CORPORATION
SINCE 1909

EMPLOYEE PROFILE

PRINCETON NICHOLS Production

Princeton has always had a love for welding. You see, for half a decade he watched videos on YouTube of other people around the world. Watching and learning, just waiting for an opportunity. When this opportunity arose at MFC, he jumped.

Princeton started with MFC in 2023 and has been welding and producing various parts ever since.

When asked what he enjoys about working at MFC, he stated "The place, the people, and the work is fun too."

When Princeton is not working he enjoys reading, traveling and playing games. He also loves being around family and taking care of his two dogs and a Normal Ball Python and an Albino Corn Snake!
