EMPLOYEE PROFILE

WESTON GADDIS Controller

After working for a number of years in the banking industry doing audit work in accounting, Weston was looking for an opening for a more hands-on role. The Controller position along with the company's history of long sustained success was an incredible opportunity.

Weston's responsibilities will include overseeing all financial aspects of the manufacturing operations, including; payroll, accounts receivable, accounts payable, budgeting, cost analysis, financial reporting, and ensuring compliance with regulations.

When asked what he enjoys about working with MFC, Weston stated *"I enjoy being able to see and work in multiple aspects of the company. Being able to directly see the impact everyone's role has at MFC is very motivating and educational, and it is fun to be part of a team where everyone has an integral role."*

During his free time, Weston enjoys hobbies which include; running, reading, coin collecting, and wood burning (as in art not just burning wood for fun... lol). He enjoys traveling and outdoor sports, including skiing. In fact, Weston's love for traveling has taken him to 40 states, 6 states in which he has lived. Now, alongside his 10-year-old labrador Hunter, he is looking forward to more adventure by crossing off the last 10 states!

Welcome Weston to the MFC Team!
